EXPERIENCE

TheIncLab, Tampa, FL — *Software Engineer*

AUGUST 2023 - current

- Played a critical role in delivering high-value software solutions to the DoD, ensuring consistent and predictable outcomes in alignment with project requirements and objectives.
- Recognized as a key team member, frequently sought out by colleagues for feedback, advice, and guidance on technical and strategic matters, showcasing strong leadership and expertise within the development team.
- Collaborated closely with cross-functional teams including project managers, engineers, designers, and stakeholders to define project scopes, prioritize tasks, and execute on project deliverables effectively.
- Demonstrated exceptional teamwork and problem-solving skills, contributing significantly to the success of multi-faceted projects within TheIncLab's portfolio for the DoD.

The Well, NYC — *Software Engineer*

MAY 2021 - JAN 2023

- Led front end development of bespoke online booking experience for THE WELL increasing the volume of online booking to 50% of total bookings.
- Spearhead end to end development of THE WELL editorial blog re-design, leading it to be the number one traffic generator to the website.
- Managed continuous enhancements and maintenance of the-well.com e-commerce and content pages.
- Collaborated cross functionally with backend engineers, UX/UI designers, product managers, brand/marketing, and operations to launch new features

Spirion, St. Petersburg, FL — *Software Engineer*

MAY 2019 - May 2021

- Developed a brand new application for administrators.
- Utilized Spirion's legacy software through RESTful APIs.
- Worked with design team to create a user-friendly dashboard.

- Improved user experience for administrators monitoring servers and endpoints.

VICE Media, Brooklyn, NY— *System Manager, Information Systems*

JULY 2015 - FEBRUARY 2019

- Managed a diverse range of internal and third-party applications within the Information Systems team.
- Conducted user administration, maintained vendor relationships, and gathered internal requirements for technical solutions.
- Developed micro web applications using JavaScript, TypeScript, Node.js, Vue, and React, utilizing platform APIs.
- Integrated various platforms to synchronize and consume data, such as connecting Netsuite with Salesforce and Adobe Sign with a Contract Management Service.
- Demonstrated proficiency in working with both enterprise-grade platforms and smaller SAAS products.
- Translated internal requirements into technical solutions for implementation, showcasing adaptability and problem-solving skills.
- Connected resources and entities based on events triggered by users or external factors.
- Ensured seamless execution and storage of templated contracts in long-term cloud storage.
